

SL-37 NEUTRAL pH CLEANER

PRODUCT DESCRIPTION:

SL-37 is a germicidal detergent that controls staph, salmonella and pseudomonas. It also eliminates tough odors. SL-37 mixes readily with water and makes a clear, stable solution. In dilution, it is non-corrosive and non-staining to plastic, vinyl and synthetics. SL-37 is a safe and effective neutral pH cleaner for general cleaning of all types of glazed and unglazed ceramic tiles, natural stone and vinyl flooring surfaces. The ceramic tile industry recommends a neutral pH cleaner for general cleaning of all tile and stone surfaces.

LIMITATIONS:

This product must not be used on food contact surfaces. Do not mix with other household cleaners. Do not use on wood surfaces. Determining the suitability of this product for any use is the sole responsibility of the user. ALWAYS TEST FIRST!

APPLICATION:

For Cleaning Walls, Floors and Industrial Work Areas: Use 2 to 8 ounces of SL-37 per gallon of water. The use of rubber or other impervious gloves is recommended for personnel performing continuous hand cleaning operations.

Cleaning and Deodorizing: Whenever practical, flush away gross soils with water. Use 2 to 8 ounces of SL-37 per gallon of water. Apply material and agitate with mop, scrub brush, rotary scrubber or other mechanical means. After agitation, remove materials with a clear water rinse and vacuum extraction, clean mop, sponge, squeegee or cloth.

COVERAGE:

One gallon of dilute mixture covers approximately 100 to 700 square feet of tile depending upon texture, absorption, thickness applied and number of coats needed.

PACKAGING:

SL-37 Neutral pH Cleaner is available in:

1-quart plastic containers

1-gallon plastic containers

5-gallon plastic containers

FIRST AID:

Irritant to eyes and mucous membranes. Harmful if swallowed. IF INGESTED: Give one or two glasses of water, do not induce vomiting and call a physician. EYES: In case of eye contact, flush thoroughly with water for at least 15 minutes. If irritation persists, seek medical attention. SKIN: The use of impervious gloves is recommended. Flush with large amounts of water. Remove contaminated clothing. Seek medical attention if irritation persists.
